SUMMER IS IN THE AIR!

June 2008

Shipping with UPS

We have recently discovered that UPS is charging us a surplus to ship in coolers vs. using cardboard boxes. If GTA ships coolers to you, you may notice that we are now shipping in cardboard boxes. If you could please re-use the boxes that we ship to you so that we can avoid that extra fee it would be greatly appreciated. If you need boxes, let us know and we will supply them. We would appreciate any help with this dilemma, but shipping in cardboard boxes is not required.

Website issues

The website has been a very big success for GTA-thanks Marjorie! We are still working on the site, and I would like to remind all of you that data posted is not confirmed until you receive an email from Kirk stating that your data has been posted to the site.

Joke of the month:

During the French Revolution a priest, a lawyer and an engineer are about to be guillotined.

The priest puts his head on the block, they pull the rope and nothing happens -- he declares that he's been saved by divine intervention -- so he's let go.

The lawyer is put on the block, and again the rope doesn't release the blade, he claims he can't be executed twice for the same crime and he is set free too.

They grab the engineer and shove his head into the guillotine, he looks up at the release mechanism and says, "Wait a minute, I see your problem...."

As always, thank you for your continued support of Grand Traverse Analytical!!
